TEJAS J SOLANKI

Full-Stack Developer & Android Builder

Rajkot, Gujarat, India | tejassolanki5881@gmail.com | github.com/Tejas3545 | linkedin.com/in/tejas-j-solanki2476

EDUCATION

Atmiya University — *Bachelor of Technology in Information Technology* (2022 – 2026)
Rajkot, Gujarat, India • Coursework: Data Structures, Database Systems (SQL), Android App Development, Operating Systems, Web Technologies

EXPERIENCE

WeIntern Pvt Ltd — *Web Development Intern* (2024 – Present | Remote)
• Building multi-page responsive web applications adhering to semantic HTML5, modern CSS3 layout systems (Grid and Flexbox), and Next.js App Router.
• Implementing accessible, component-driven UI architecture, dark/light theme switching, and fluid micro-interactions.
• Managing structured Git version control workflows, automated deployment verification, and technical documentation.

Zidio Development — *Data Science Intern* (Jun 2025 – Sep 2025 | Remote)
• Developed machine learning models for customer churn prediction using Logistic Regression and Random Forest with scikit-learn.
• Conducted exploratory sales data analysis, created feature importance reports, and developed NLP classification utilities.

FEATURED PROJECTS

SyncSpend – Offline-First Native Android Expense Tracker [Kotlin, Jetpack Compose, Room SQLite, WorkManager]
• Developed an offline-first Android expense manager with instant local Room SQLite persistence and reactive Kotlin StateFlow.
• Implemented background synchronization powered by Android WorkManager to sync records to Notion and cloud storage without blocking UI.

Atmiya IT Portal – Department Attendance & Academic Dashboard [Python, Flask, JavaScript, REST API, Excel Engine]
• Engineered a centralized web portal replacing departmental spreadsheets for student attendance tracking, weekly breakdowns, and compensation status.
• Built an automated Excel data ingestion parser and clean REST API backend with responsive analytics dashboard.

ADSCHACKATHON – Live Hackathon Leaderboard Engine [Next.js, TypeScript, MongoDB, Server-Sent Events]
• Real-time hackathon scoring system polling team GitHub repositories every two minutes to evaluate commits against milestone rules and award XP via SSE.

Smart AI Business Assistant Platform [Python, FastAPI, RAG, PostgreSQL, Docker]
• Production-ready MVP combining an AI assistant, RAG document retrieval, lead capture pipeline, and admin management dashboard.

TECHNICAL SKILLS

Languages & Core: Kotlin, Java, Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frameworks & Web: Next.js (App Router), React, Jetpack Compose, Flask, FastAPI, Tailwind CSS, Express
Databases & Systems: Room SQLite, PostgreSQL, MySQL, MongoDB, Firebase, Android SDK, WorkManager
Developer Tools: Git, GitHub, Android Studio, VS Code, Linux CLI, Vercel, Docker, Postman, Figma
